Architectural Glazing

Laminated glass interlayers

Introduction

Interlayer strength, depth and capabilities

Delivering your window into the world of advanced interlayers for laminated safety glass, Kuraray’s Advanced Interlayer Business is underpinned by decades of innovation, application knowledge, domain experience and market success.

OUR ADVANCED INTERLAYER PORTFOLIO – comprising Trosifol® PVB and SentryGlas® ionoplast interlayers – has continually revolutionized aesthetic, structural and functional design, fabrication and installation in the architectural and automotive/transportation segments.

Designed to benefit consumers, society and industry, our products are advancing the functionality of glass, while our engineers and consultants are setting new application benchmarks by collaborating on solutions that both sustain and inspire.

We are committed to helping you transform your mindset and take your applications to the next level – aesthetically, functionally and structurally. Enjoy greater design freedom and give your glazing strength, clarity, character and purpose with solutions that cover safety, security, sound insulation, UV/solar/energy management, color and print.

• Seminole Hard Rock Hotel & Casino, Hollywood, Florida

OUR DIVERSE PRODUCT RANGE, the broadest on the global market and our domain expertise create strength; and we channel this strength into helping you succeed. We strive to be your strongest ally and supporter and will help you navigate and conquer the ever-changing demands of the global glass industry. Worldwide production, R&D and support, means we are always by your side... no matter where you are.

Safety Interlayers

Transparency and safety

SAFETY INTERLAYERS – HIGHLIGHTS

- World market leader in the architectural sector
- Lowest Yellowness Index of all PVB films in the market
- Trosifol® PVB films available with different degrees of adhesion levels
- Exclusive manufacturer of SentryGlas® ionplast interlayers
- Research and development centers in each region

APPLICATIONS & RECOMMENDATIONS

- For laminated safety glass products made of heat-strengthened or fully tempered glass, we recommend high adhesion, e.g. Trosifol® UltraClear and Trosifol® Clear with J adhesion.
- If there is a need for high adhesion on open edges we recommend Trosifol® UltraClear or SentryGlas®.

Yellowness Index for Trosifol®, SentryGlas® and competitors

Structural and Security Interlayers

Exceptional strength up to 330 cm (130 in)

STRUCTURAL AND SECURITY INTERLAYERS – HIGHLIGHTS

- Extraordinary post-breakage strength
- High film shear modulus
- Excellent edge stability
- Outstanding clarity
- Open edge design thanks to SentryGlas®

APPLICATIONS & RECOMMENDATIONS

- SentryGlas® is the best choice, with over 20 years of outdoor exposure, for open edge applications that require the very best edge durability and optics.
- SentryGlas® is recommended for applications that require the highest structural performance over a broad range of temperatures and loads.
- SentryGlas® Translucent White provides full structural performance along with a translucent white effect for privacy.
- For moderate design temperature we recommend Trosifol® Extra Stiff.
- For elevated design temperature we recommend SentryGlas®.
- SentryGlas® Xtra™ has the best optical performance in very thick laminates.
- We recommend SentryGlas® Xtra™ for multi-ply laminate assemblies as an adhesion promoter is no longer required.

TAB 5 ● G(t) data were determined by Dynamic Mechanical-Analysis in accordance to EN ISO 6721 within the linear range of deformation. All samples were stored at 23°C for 4 weeks before measurement. G(t) data were experimentally verified by 4-Point-Bend-Tests on laminated glass following prEN 16613 at third party labs for selected time-load combinations.

Sound Control Interlayers

Customized sound insulation

ACOUSTIC INTERLAYERS – HIGHLIGHTS

- Sole supplier of mono- and multilayer PVB for the Acoustic Glazing market
- R_w or STC/OITC values of 50 dB and better in insulated glass
- Trosifol® SC Multilayer may be combined with standard and colored PVB
- Trosifol® SC Monolayer has the best optical properties in terms of “orange peel”

APPLICATIONS & RECOMMENDATIONS

- Thanks to its high adhesive strength, Trosifol® SC Monolayer is particularly suitable for laying between plies of heat-strengthened or fully tempered glass.
- Trosifol® SC Multilayer is ideal for achieving impact resistance level P2A conforming to EN 356.
- Trosifol® SC Multilayer can be combined with other Trosifol® products.
- Best optical properties in terms of orange peel with Trosifol® SC Monolayer.
- Laminated safety glass containing a Trosifol® SC Monolayer / Trosifol® SC Multilayer has up to 3 dB better sound insulation than the same construction with standard PVB film.

Decorative Interlayers

Brilliant colors

DECORATIVE INTERLAYERS – HIGHLIGHTS

- Interior and exterior applications thanks to outstanding color fastness
- Opaque Trosifol® Diamond White
- Totally opaque Trosifol® Brilliant Black
- Different degrees of translucency in the white color range

APPLICATIONS & RECOMMENDATIONS

- For total opacity, we recommend Trosifol® Brilliant Black and Trosifol® Diamond White.
- With strong colors, high color intensity is achieved with just a single film in the glass module, making further layers unnecessary.
- To achieve the same effects as body tinted glass, we recommend the tinted colors.

SPECIALIZED INTERLAYERS – HIGHLIGHTS

- Autoclave-free processing with Trosifol® HR
- High surface roughness for better deairing with Trosifol® HR
- 0% UV transmittance up to 400 mm with UV Extra Protect
- Trosifol® XT UltraClear: Special PVB hurricane grade with UltraClear appearance
- Maximum UV transmittance for SentryGlas® Natural UV and Trosifol® Natural UV
- Trosifol® Spallshield® CPET is a hard coated PET film
- Trosifol® PET is a super clear film with pre-treatment on both sides designed for adhering to PVB.

APPLICATIONS & RECOMMENDATIONS

- Trosifol® Natural UV and SentryGlas® Natural UV feature high UV transmittance with applications in greenhouses, zoos and the health sector.
- Complete UV protection Trosifol® UV Extra Protect for museums, shop windows and libraries, for example.
- High surface roughness of Trosifol® HR for better deairing.
- Trosifol® Spallshield® CPET hard-coated PET film helps to stop the showering of small glass particles.
- Trosifol® PET adds strength to the PVB improving both safety and security of the glass laminate.
- All hurricane products require system testing and approval.

Tools & Apps

WINSLT

For calculating the light, solar and heat parameters of glazing specifically containing films from the Trosifol® & SentryGlas® product range:

SOUNDLAB

For calculating acoustic performance of monolithic, double and triple glazed units.

SOLUTION FINDER

For finding the right product of your project

* Only available as web app

GLASGLOBAL

For performing structural analysis for glass:

SOUNDLAB AI

First global acoustic calculator based on artificial intelligence for calculating/estimating acoustic performance of monolithic, double and triple glazed units.

STRENGTH OF GLASS CALCULATOR

The easy-to-use Calculator is designed to help designers and architects accurately model a variety of glass-mounting solutions in combination with glass types, interlayer materials and external factors such as loads, load duration and temperatures.

LAMINATED GLASS NEWS

Breathtaking architecture made of glass: Internationally recognized architects, engineers and planners report about their reference projects, latest design trends and constructive solutions. Furthermore you will receive all important news about our business and products with the Laminated Glass News.
