OPTIONS

### MINIMIZE DAY/NIGHT RISK OF BIRD COLLISIONS

Sevasa acid-etched visual markers are defined by means of size, density, contrasted surface structure and side (exterior, side#1) in order to minimize risks such as mirror effect or fly-through condition.

### COMPLY WITH LOCAL REGULATIONS OR NATIONAL GUIDELINES when required.

- Meet the recognized 2x4 rule and other tighter mandatory or voluntary regulations.

### OPTIONS FOR ANY GLASS BASE, EVEN COATED ON SIDE #2: Low-E, reflective, solar control...(to consult)

- Custom designs available on demand.

Colour: clear, low-iron and/or coated (to consult).

Thickness: 4 to 12 mm - 5/34" to 1/2" in.

Sizes: Standard 2250 x 3210 mm - 88 x 126 1/3" in.

Option: 2400 x 3210 mm - 94 1/2 x 126 1/3" in.

Company with integrated  
Quality & Environmental  
Management. Ecological  
and Sustainable.

**Certified ISO 14.001 Environmental Management System**
